

## Triangulation

If you see one lover  
In another,  
You are loving  
One another.

This lover  
You are seeing.  
Is it not the one in front of you?

If your lover appears  
Through the one in front of you,  
Is it because of your love for them?

Is it their love for you, too  
That makes you see  
That lover  
Looking back at you?

It must be a triangle.  
In that,  
You also have to love  
The one who is in front of you.

Yet, the one who is  
In front of you  
Does not have to love the other;  
Only you do.
